

WEEE Information for Supermicro Customers and Recyclers

WEEE Directive (2002/96/EC)

The Waste Electrical and Electronic Equipment Directive (WEEE) applies to companies that manufacture, sell, distribute, recycle or treat electrical and electronic equipment to consumers in the European Union (EU). It covers all large and small household appliances, IT equipment, radio and audio equipment, electrical tools and telecommunications equipment. The directive aims to reduce the waste arising from electrical and electronic equipment and to improve the environmental performance of all those involved in the life cycle of these products.

Supermicro products are within the WEEE directive under B2B IT and telecommunications equipment category. The Wheelie Bin symbol found on the product or in the owners manual indicates that this product must not be disposed of with other waste.

Under the Waste Electrical and Electronic Equipment (WEEE) Directive and implementing regulations, when customers buy new electrical and electronic equipment from Supermicro they are entitled to: send old equipment for recycling on a one for one, like for like basis (this varies depending on the country) send the new equipment back for recycling when this ultimately becomes waste Instructions to both customers and recyclers/treatment facilities wishing to obtain disassembly information are provided by following the links below.

Recyclers

Are you a recycler / treatment facility wanting information on how to disassemble and recycle a Supermicro product?

As part of compliance with the WEEE Directive, Supermicro provides recycling information on request for all types of new equipment put on the market in Europe after August 13th 2005.
