

Retail in a Box

All-in-One Edge Infrastructure Solution for Stores

Retail-in-a-Box is a compact, all-in-one solution purpose-built for modern retail environments, enabling AI-powered applications, analytics, and store modernization without disrupting valuable floor space. Designed for easy deployment on walls or in small cabinets and seamless integration with existing systems and cameras, it brings advanced IT capabilities to even the most space-constrained locations.

The solution is quick to install, simple to manage, highly secure, and ready to support data-driven innovation across the retail floor. By combining Supermicro's industry-leading server technology, Schneider Electric's robust infrastructure, and Avnet's global services, Retail-in-a-Box delivers a consistent, scalable platform for retailers everywhere.

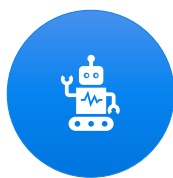

Retail-in-a-Box Contents [†]

Enclosure	Wall-mountable 6U System Rack (60x60x35.5 cm / 23.6x23.6x14.0")	
Server Options	AS -1115S-FWTRT SYS-111AD-WRN SYS-112B-FWT SYS-212B-FN2T	(1U server with AMD EPYC™ 9004/9005 processor) (1U server with Intel® Core™ series processor) (1U server with Intel® Xeon® 6 series processor) (2U server with Intel® Xeon® 6 series processor)
AI Acceleration	Extensive GPU support, including up to 2 double-width cards such as NVIDIA L40S, NVIDIA RTX PRO™ Blackwell Max-Q Workstation Edition, or low-profile cards	
Power	Built-in backup power (UPS)	
Networking	Integrated high-speed ethernet switch Pre-wired networking	
Management	Schneider EcoStruxure management platform	
Software	Pre-loaded Retail Software solutions available	
Service	Warranty & onsite services from installation to ongoing support
