The information in this User's Guide has been carefully reviewed and is believed to be accurate. The vendor assumes no responsibility for any inaccuracies that may be contained in this document, and makes no commitment to update or to keep current the information in this user's guide, or to notify any person or organization of the updates. Please Note: For the most up-to-date version of this user's guide, please see our Website at www.supermicro.com.

Super Micro Computer, Inc. ("Supermicro") reserves the right to make changes to the product described in this user's guide at any time and without notice. This product, including software and documentation, is the property of Supermicro and/or its licensors, and is supplied only under a license. Any use or reproduction of this product is not allowed, except as expressly permitted by the terms of said license.

IN NO EVENT WILL SUPER MICRO COMPUTER, INC. BE LIABLE FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, SPECULATIVE OR CONSEQUENTIAL DAMAGES ARISING FROM THE USE OR INABILITY TO USE THIS PRODUCT OR DOCUMENTATION, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN PARTICULAR, SUPER MICRO COMPUTER, INC. SHALL NOT HAVE LIABILITY FOR ANY HARDWARE, SOFTWARE, OR DATA STORED OR USED WITH THE PRODUCT, INCLUDING THE COSTS OF REPAIRING, REPLACING, INTEGRATING, INSTALLING OR RECOVERING SUCH HARDWARE, SOFTWARE, OR DATA.

Any disputes arising between the manufacturer and the customer shall be governed by the laws of Santa Clara County in the State of California, USA. The State of California, County of Santa Clara shall be the exclusive venue for the resolution of any such disputes. Supermicro's total liability for all claims will not exceed the price paid for the hardware product.

FCC Statement: This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer’s instruction manual, may cause harmful interference with radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case you will be required to correct the interference at your own expense.

California Best Management Practices Regulations for Perchlorate Materials: This Perchlorate warning applies only to products containing CR (Manganese Dioxide) Lithium coin cells. “Perchlorate Material-special handling may apply. See www.dtsc.ca.gov/hazardouswaste/perchlorate”.

WARNING: Handling of lead solder materials used in this product may expose you to lead, a chemical known to the State of California to cause birth defects and other reproductive harm.

About this User's Guide

This user's guide is written for system integrators, PC technicians and knowledgeable PC users. It provides information for the installation and use of the AOC-C25G-m1S add-on card.

About this Add-on Card

The Supermicro AOC-C25G-m1S, based on Mellanox® ConnectX®-4 Lx EN controller, is the most advanced and compact 25GbE solutions for our high density MicroCloud and Twin series servers. With MicroLP form factor and lower power consumption, it can fit in small spaces while providing the highest networking bandwidth for data centers. It is backward compatible with 10GbE networks and represent the most cost effective upgrade from 10GbE to 25GbE. The AOC-C25G-m1S, designed to provide the best performance and optimized Cloud efficiency, is an excellent choice for customers who are looking to expand their networks with the highest bandwidth connectivity.

An Important Note to the User

All images and layouts shown in this user's guide are based upon the latest PCB Revision available at the time of publishing. The card you have received may or may not look exactly the same as the graphics shown in this user's guide.

Returning Merchandise for Service

A receipt or copy of your invoice marked with the date of purchase is required before any warranty service will be rendered. You can obtain service by calling your vendor for a Returned Merchandise Authorization (RMA) number. When returning the motherboard to the manufacturer, the RMA number should be prominently displayed on the outside of the shipping carton, and the shipping package is mailed prepaid or hand-carried. Shipping and handling charges will be applied for all orders that must be mailed when service is complete. For faster service, You can also request a RMA authorization online (http://www.supermicro.com).
This warranty only covers normal consumer use and does not cover damages incurred in shipping or from failure due to the alternation, misuse, abuse or improper maintenance of products.

During the warranty period, contact your distributor first for any product problems.

**Conventions Used in the User's Guide**

Pay special attention to the following symbols for proper system installation and to prevent damage to the system or injury to yourself:

**Warning:** Important information given to ensure proper system installation or to prevent damage to the components or injury to yourself.

**Note:** Additional information given to differentiate between various models or provides information for correct system setup.

**Naming Convention**

**SMC Networking Add-on Cards**

Chapter 1

Overview

1-1 Overview

Congratulations on purchasing your add-on card from an acknowledged leader in the industry. Supermicro products are designed with the utmost attention to detail to provide you with the highest standards in quality and performance. For product support and updates, please refer to our website at http://www.supermicro.com/products/nfo/networking.cfm#adapter.

1-2 Key Features

The key features of this add-on card include the following:

• Single SFP28 (Small Form Factor Pluggable) Connector

• MicroLP Form Factor

• PCI Express 3.0 x8 (8GT/s)

• Hardware offloads for NVGRE, VXLAN and GENEVE encapsulated traffic

• SR-IOV for virtualization

• Low latency RDMA over Converged Ethernet (RoCE)

• Jumbo Frames support

• NC-SI for remote management

• Support Direct Attach Copper and Fiber Cables

• RoHS compliant 6/6

1-3 Specifications

General

• Mellanox® ConnectX®-4 Lx EN controller

• MicroLP form factor
• Single SFP28 connector with speed up to 25Gb/s per port

• PCI-E 3.0 x8 (8GT/s) interface

**Ethernet**

• 25GbE/10GbE/1GbE

• IEEE 802.3ad, 802.1AX Link Aggregation

• IEEE 802.1Q, 802.1P VLAN tags and priority

• IEEE 1588v2

• Jumbo frame support (9.6KB)

**Enhanced Features**

• Hardware-based reliable transport

• Collective operations offloads

• Vector collective operations offloads

• 64/66 encoding

• Dynamically Connected Transport (DCT)

• Enhanced Atomic operations

• Support for MSI/MSI-X mechanisms

**Storage Offloads**

• RAID offload – erasure coding (Reed-Solomon) offload

**Overlay Networks**

• Stateless offloads for overlay networks and tunneling protocols

• Hardware offload of encapsulation of NVGRE and VXLAN overlay networks
Hardware-based I/O Virtualization

- Single Root IOV
- Multi-function per port
- Multiple queues per virtual machine
- VMware NetQueue support

Virtualization

- SR-IOV: Up to 256 Virtual Functions
- SR-IOV: Up to 16 Physical Functions per port

CPU Offloads

- RDMA over Converged Ethernet (RoCE)
- TCP/UDP/IP stateless offload
- LSO, LRO, checksum offload
- RSS (can be done on encapsulated packet), TSS, HDS, VLAN insertion/stripping, Receive flow steering
- Intelligent interrupt coalescence

Management Features

- Remote boot over iSCSI
- PXE and UEFI
- NC-SI for remote management

OS Support

- RHEL/CentOS (7.2, 7.1, 7.0, 6.8, 6.7, 6.6, 6.5, 6.2)
- Windows (2012 R2, 2012)
- FreeBSD (11)
- VMware (6.5, 5.5)

**Cables Support**
- Direct attach twinaxial copper cables
- Fiber-optic cables (with required optional transceivers)

**Power Consumption**
- AOC-C25G-m1S: Maximum 8.5W

**Operating Conditions**
- Operating temperature: 0°C to 55°C (32°F to 131°F)
- Storage temperature: -40°C to 70°C (-40°F to 158°F)
- Storage humidity: 90% non-condensing relative humidity at 35°C

**Physical Dimensions**
- Card PCB dimensions: 11.3cm (4.45in) x 3.9cm (1.54in) (L x H)

**Compliance/Environmental**
- RoHS Compliant 6/6, Pb Free

**Supported Platforms**
- Supermicro Twin Servers and MicroCloud Systems with MicroLP expansion slot (see MicroLP Compatibility Matrix online at [http://www.supermicro.com/support/resources/aoc/microLP_compatibility.cfm](http://www.supermicro.com/support/resources/aoc/microLP_compatibility.cfm))

Hardware Components

2-1  Add-On Card Image and Layout

The AOC-C25G-m1S Image

The AOC-C25G-m1S Layout

| 1. Mellanox® ConnectX®-4 Lx EN | 4. PCI-E 3.0 x8 interface |
| 2. SFP1: SFP28 Port            |                             |
| 3. D2: SFP28 Port Link/Activity LED |                           |
2-2  Major Components

The following major components are installed on the AOC-C25G-m1S:

1. Mellanox® ConnectX®-4 Lx EN Controller
2. Single SFP28 (Small Form Factor Pluggable) Ports
3. One (1) SFP28 Link/Activity LED Indicator
2-3  SFP28 Ethernet Connections

**SFP28 (SFP1) Connector**

One small form-factor pluggable (SFP28) optical transceiver connector (SFP1) is on the add-on card. The SFP28 port provides Ethernet up to 25GbE network connections. See the layout below for the location.

---

**SFP28 (SFP1) Link/Activity LED Indicator**

One LAN Link/Activity LED indicator is located at D2 on the add-on card. See the table and layout below for the LED states and location.

3-1  Static-Sensitive Devices

Electrostatic Discharge (ESD) can damage electronic components. To avoid damaging your add-on card, it is important to handle it very carefully. The following measures are generally sufficient to protect your equipment from ESD.

**Precautions**

- Use a grounded wrist strap designed to prevent static discharge.

- Touch a grounded metal object before removing the add-on card from the antistatic bag.

- Handle the add-on card by its edges only; do not touch its components, or peripheral chips.

- Put the add-on card back into the antistatic bags when not in use.

- For grounding purposes, make sure that your system chassis provides excellent conductivity between the power supply, the case, the mounting fasteners and the add-on card.

**Unpacking**

The add-on card is shipped in antistatic packaging to avoid static damage. When unpacking your component or your system, make sure that the person handling it is static protected.

⚠️ **Warning:** To avoid damaging your components and to ensure proper installation, be sure to always connect the power cord last, and always remove it before adding, removing or changing any hardware components.
3-2  Add-On Card Brackets

The add-on card ships with a PCB bracket that is pre-installed at the factory. For 1U systems, an I/O bracket is also pre-installed on the card. For 2U systems, the I/O bracket is bundled with the card and must be installed by the customer. See the drawings below for bracket details.

For 2U System

BKT-0051L (Factory installed MicroLP PCB bracket)

For 1U System

BKT-0109L (Factory installed I/O bracket)

3-3  Before Installation

To install the add-on card properly, be sure to follow the instructions below.

1. Power down the system.

2. Remove the power cord from the wall socket.

3. Use industry standard anti-static equipment (such as gloves or wrist strap) and follow the instructions listed on Page 3-1 to avoid damage caused by ESD.

4. Familiarize yourself with the server, motherboard, and/or chassis documentation.

5. Confirm that your operating system includes the latest updates and hotfixes.
3-4 Installing the Add-on Card

Follow the steps below to install the add-on card into your system.

1. Remove the server cover and, if necessary, set aside any screws for later use.

2. Remove the add-on card slot cover. If the case requires a screw, place the screw aside for later use.

3. Position the add-on card in the slot directly over the connector, and gently push down on both sides of the card until it slides into the PCI connector.

4. Secure the add-on card to the chassis. If required, use the screw that you previously removed.

5. Attach any necessary external cables to the add-on card.

6. Replace the chassis cover.

7. Plug the power cord into the wall socket, and power up the system.

3-5 Installing Drivers from the CD-ROM CDR-NIC

Follow the steps below to install the drivers needed for your Windows OS support. The controller comes with a driver on the CD-ROM CDR-NIC.

1. Run the CDR-NIC. (If you do not have a product CD-ROM, download drivers from the Supermicro Support Website and then transfer them to your system.)

2. When the SUPERMICRO window appears, click on the computer icon next to the product model.

Note: If the FOUND NEW HARDWARE WIZARD screen displays on your system, click CANCEL.
3. Click on INSTALL DRIVERS AND SOFTWARE.

4. Follow the prompts to complete the installation.

### 3-6 Installing Drivers

Use the procedures below to install drivers for the AOC-C25G-m1S add-on card for both Linux and Windows.

#### Linux Drivers

Use the following procedures to install drivers on the Linux operating system.

**Installing 25G Drivers for the Linux Operating System**

1. From the CDR-NIC LAN driver CD or FTP site, go to the following directory: Mellanox > Linux.

2. Download the Linux driver package file.

3. Install the driver by entering the following commands:

   ```
   tar xzvf mlnx-en-<ver>.tgz
   cd mlnx-en-<ver>
   ./install.sh
   ```

   This installs the Linux drivers to your system.

#### Windows Drivers

Use the following procedures to install drivers on the Windows operating system.

**Installing 25G Drivers for the Windows Operating System**

1. From the CDR-NIC LAN driver CD or FTP site, go to the following directory: Mellanox > Windows.

2. Choose the desired Windows driver package file.

3. Double-click to run and install the driver package file.
The products sold by Supermicro are not intended for and will not be used in life support systems, medical equipment, nuclear facilities or systems, aircraft, aircraft devices, aircraft/emergency communication devices or other critical systems whose failure to perform be reasonably expected to result in significant injury or loss of life or catastrophic property damage. Accordingly, Supermicro disclaims any and all liability, and should buyer use or sell such products for use in such ultra-hazardous applications, it does so entirely at its own risk. Furthermore, buyer agrees to fully indemnify, defend and hold Supermicro harmless for and against any and all claims, demands, actions, litigation, and proceedings of any kind arising out of or related to such ultra-hazardous use or sale.
