

## **5015M-Ni Server Manual Addendum (MNL-0898, rev. 1.0)**

The Universal Information LED chart on page 3-2 gives incorrect LED states for fan fail and power fail. The correct states are shown below:

Universal Information LED States

State	Indication
Fast Blinking Red (1x/sec)	Fan Fail
Solid Red	CPU Overheat
Slow Blinking Red (1x/4 sec)	Power Fail
Solid Blue	Local UID Button Pressed
Blinking Blue	IPMI-Activated UID

This will be corrected in the next revision of the manual.
