IPMI Release Notes Form

Product Name	**X12DPG-AR**
Release Version	**1.4a SPS: 4.4.4.202**
Build Date	**11/09/2022**
Previous Version	**1.4**
Update Category	**Recommended**
Dependencies	**None**
Important Notes	**None**
Enhancements	1. Updated Intel BKC to 2022_WW40(KIT #743788) PLR3 Out Of Band (OOB), RC 2. Updated Intel BKC to 2022_WW40(KIT #743788) PLR3 Out Of Band (OOB), CPU 606A6 Microcode 3. Updated Intel BKC to 2022_WW40(KIT #743788) PLR3 Out Of Band (OOB), Intel VROC UEFI 4. Updated Intel BKC to 2022_WW40(KIT #743788) PLR3 Out Of Band (OOB), Intel PMEM UEFI
Fixes	1. Changed SMBIOS parameters to accommodate BMC sensor readings

Release Notes from Previous Release(s)

1.4 (8/27/2022)

1. Intel updated BKC to fix general platform issues. RC is updated to 27.P82
2. Intel updated BKC to fix general platform issues. SPS is updated to 4.4.4.202
3. Intel updated BKC to fix general platform issues. ACM is updated to 1.1.0h
4. Intel updated BKC to fix general platform issues. SINIT is updated to 1.1.0h
5. Intel updated BKC to fix general platform issues. CPU 606A6 Microcode is updated to 0D000375
6. Intel updated BKC to fix general platform issues. Intel VROC UEFI is updated to 7.6.0.1012
7. Intel updated BKC to fix general platform issues. Intel PMEM UEFI is updated to 2.0.0.3886

1.2a (04/14/2022)

1. Fixed an issue where there is no CPU1 information on setup menu.

2. When using a AOC-S25G-i2S, there are no config items on setup menu. This item is Fixed.

1.2 (01/22/2022)

3. Intel update BKC to fix general platform issues. RC is updated to 27.P52.
4. Intel update BKC to fix general platform issues. SPS is updated to 4.4.4.62.
5. Intel update BKC to fix general platform issues. ACM is updated to 1.0.Eh.
6. Intel update BKC to fix general platform issues. SINIT is updated to 1.0.Fh.
7. Intel update BKC to fix general platform issues. CPU 606A6 Microcode is updated to 0D000331.
8. Intel update BKC to fix general platform issues. Intel VROC UEFI is updated to 7.7.0.1054.
9. Intel update BKC to fix general platform issues. Intel PMEM UEFI is updated to 2.0.0.3885.

1.1a (08/14/2021)

1. Changed BIOS revision to 1.1a.
2. Updated Intel Update RC.
3. Updated Intel Update SPS.
4. Updated CPU microcode 606A4 microcode.
5. Updated Intel Update BIOS ACM.
6. Updated Intel Update SINIT ACM.
7. Updated NVDIMM UEFI HII.
8. Updated Intel VMD VROC firmware.
9. Added support to some riser cards.
10. Fixed the issue with watchdog NMI.
